### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 14 April 2008 has been entered.

Claims 17 and 25 have been amended. Claim 26 has been canceled.

2. Claims 17-25 and 27 are pending and under consideration.

### **Rejections Moot or Withdrawn**

3. The rejection of claim 26 under 35 U.S.C. 112, second paragraph, indefiniteness for claimed invention, is moot in light of the cancelation of the claim.

4. The rejection of claim 26 under 35 U.S.C. 112, second paragraph, indefiniteness for possible identical claimed material, is moot in light of the cancelation of the claim.

5. The rejection of claims 17-25 and 27 under 35 U.S.C. 112, second paragraph, as being indefinite for claimed invention, is withdrawn in light of the amendment of the claims.

### **Claim Rejections - 35 USC § 112**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 27 depends from claim 17.

Claim 17 is drawn to a method of producing a protective immune response against a pathogen by administration to a lung of a mammal, a protective amount of an aerosol comprising biodegradable microspheres which comprise a reagent that produces a protective immune response against the pathogen.

Claim 27 is the method of claim 17 wherein the aerosol further comprises the non-living reagent in free form.

It is unclear what quantity of free-form reagent may be present since the microspheres already a protective amount of said reagent, or what constitutes the metes and bounds of being "free form".

### **Conclusion**

7. Claim 27 is rejected.
